Further details of Rackspace's data centre can be found [here](#).

The 'worstkeptsecret.org.uk' website is hosted by Namecheap using a US data centre that is compliant with GDPR.

The 'Bullybusters.org.uk' website is hosted by Linode, using a UK data centre located in London, England. For increased business continuity backups are stored by AmazonS3 located in Ireland.

All Linode & AWS facilities enforce multi-factor authentication and security via a variety of technological and human measures. With 24x7 surveillance support, managing and monitoring data center access activities, with equipping local teams to respond to security incidents. Beyond that, all equipment is securely locked in cages.

Door alarming devices are also configured to detect instances where an individual exits or enters a data layer without providing multi-factor authentication, to help ensure that only authorised engineers have access to routers, switches and servers.

On web servers we enforce strict filtering rules to ensure that servers only communicate using their allowed IP addresses. This prevents spoofing other IPs or performing man-in-the-middle attacks on our private network.
